Quick Duplexing for higher productivity

Boasting 24-ppm Quick Duplexing, Panasonic's KX-MB2100 series will give your business an immediate and dramatic boost in productivity, as well as offering the following advantages.

Save time

The KX-MB2100 series' Quick Duplexing can print out double-sided documents at a rate of 24 ppm, effectively cutting print time in half when compared to standard 26-ppm MFP duplexing.

Save space

Because you only need half as much paper – or even just a 1/4 as much when 2-in-1 duplex is used – you'll need a lot less storage space.

Save money

You'll also save plenty on consumables. With 2-in-1 duplex, you can slash paper consumption by as much as 75%, while cutting toner consumption in half. Printer operating time is also reduced, saving electricity cost.

QUICK-JOB key for easy and quick operation

Up to three frequently-used functions or complicated copy/scan settings can be programmed to the QUICK-JOB key and recalled at the touch of a button, saving you time and trouble.

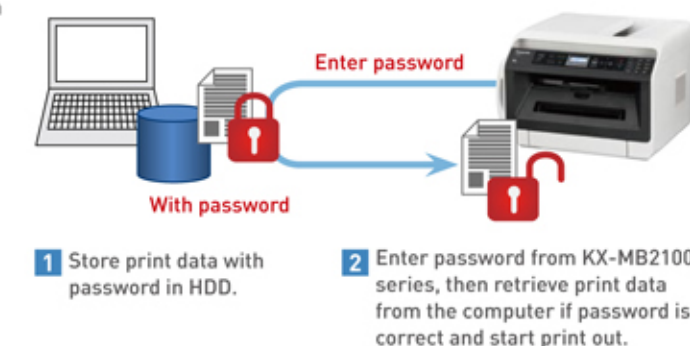

Program your preferred 2 in 1 and duplex combined copy settings. You can quickly recall and execute the program with the appropriate QUICK-JOB key for mistake-free operation, without having to repeat the same sequence of steps at every time.

Secure printing to keep your business secure

With Secure Print, you can prevent confidential documents from being leaked by protecting them with very high level security. Print data is password-protected and temporarily stored on your computer's hard drive. It can be retrieved and printed only when the password is entered on the printer. Plus, there is no limit to the number of pages you can store since, unlike most secure print systems that use memory-based storage, the secure print data is stored on your PC's hard drive.*

* Up to 30 jobs can be printed at a time from print data on the hard drive. If there are more than 30 jobs, additional jobs can be printed out after the first 30 jobs have completed.

Mobile and remote printing for mobile devices*

The KX-MB2100 series is compatible with the Google Cloud Print™ and Panasonic mobile print application**, enabling printing from mobile devices such as tablets and smartphones and giving your business the edge in today's fast-moving world.

* Available on the KX-MB2170CXB and KX-MB2130CXW.
** Planned to provide the application via App Store and Google Play by the beginning of 2015.
