Battery back up for unexpected power failures

Power Back-Up Operation

During an electric power failure, the power stored in batteries* can be supplied to the base unit. This allows you to make a call with handset even when the power is out.

*Batteries not supplied. 2 AAA (R03) rechargeable Ni-MH batteries required.

Reduce unwanted calls such as telemarketers

DECT Security

Communications between the cordless handset and base unit are encrypted, and the encryption password is periodically changed to maintain a high level of security.

Reduce unwanted calls such as telemarketers

Nuisance Call Block*

You can block specified numbers, numbers that match the first 2 to 8 digits of set numbers and numberless calls. A dedicated call block button also enables you easily register to the call block list.

*Requires subscription to Caller ID service offered by your provider/telephone company. Numberless calls cannot be blocked depending on the service of your provider/telephone company.

Catch answering machine calls whether you are at home or away

Advanced Answering System*

When a new message is recorded on the answering machine, the base unit can alert you with a sound. Furthermore, when you are away, it can send an alert by a call to a pre-registered mobile phone or office phone.

* KX-TGF320 only
